DETAILED ACTION

Claim Objections

Claims 11-22 are objected to because of the following informalities:

The cutting edges of the centering tip should be differentiated from the cutting edges of the rake face since the recitation "said cutting edges" in claim 11, line 8 appears to introduce the cutting edge of the rake face. Independent claim 21 has a similar recitation.

The recitation "at least in a region directly adjacent said cutting edges" in claim 11, line 12 and 13 is misleading as to whether the rake and wedge angles in claim 11, lines 13 and 14 limit the centering tip or rake face. All dependent claims are likewise objected to. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 11, 13, 14 and 20-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Turner et al., U.S. 6,102,634.

As best understood by the Examiner, Turner discloses a shaft (3) having a cutting plate (5), a centering tip (11) with lateral regions (17a,17b,19a,19b) forming

backset chisel edges; a rake face (13) having a flank (23), rake (25) and offset cutting edges (21); wherein the centering tip has a perpendicular distal end and a wedge angle of 55 degrees. Turner et al. discloses in column 2, lines 60-65 a tip width greater than one quarter the bit diameter.

Allowable Subject Matter

Claim 12 and 15-19 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
